WEB APPLICATION SECURITY TESTING (SAFE TO HOST) CERTIFICATE

Organization Name	: NEXTGEN ESOLUTIONS PVT LTD SUBSIDIARY COMPANY OF AIMIL LIMITED
Application Name	: HospiLogix HIMS Web App v5.0, ABHA M1, M2 & M3 APIs
Temporary Application URL	: https://abha.hospilogix.com/abha_testing/
Security Testing Start & End Date	: October 01, 2024 to April 29, 2025
Audited By	: Munjaram Rasave (infosec@sumasoft.net / +91.20.40130400)

Observation: The above-mentioned HospiLogix HIMS Web Application v5.0 along with Integrated ABHA Milestone 1 (M1), Milestone 2 (M2) & Milestone 3 (M3) APIs v3 developed as part of the Ayushman Bharat Digital Mission (ABDM) Sandbox Integration and Exit process, has undergone Vulnerability Assessment & Penetration Testing and has been certified to be safe from the known vulnerabilities. The contents audited were based on the Web Application URL mentioned above.

Conclusion: We have tested the HospiLogix HIMS Web Application v5.0 along with Integrated ABHA Milestone 1 (M1), Milestone 2 (M2) & Milestone 3 (M3) APIs v3 developed by NEXTGEN ESOLUTIONS PVT LTD SUBSIDIARY COMPANY OF AIMIL LIMITED for OWASP web Top 10 2021 vulnerabilities. The said Web Application is free from OWASP Top Ten known vulnerabilities and is safe for hosting as on date of submission of the security certificate. The Web Application has dynamic content meant to be available to Authorized users only.

MD5 for Root Folder (Zip) : 42669297778e278f1b8db82372355b97

Recommendations for Hosting in the Production:

1. The Web Application may be hosted with limited privileges (Without Administrator/Root) of Read and Script Execution permissions.
2. Operating System, Web Server and Database Server hardening needs to be in place for the production server along with encrypted transport layer (SSL) protection.
3. Use latest version of software technology in production environment with OEM recommended patches.

Note - The security certificate is valid for 1 year from the date of issuance, given that no dynamic changes are made to the application source code. If any alterations, such as modifications to the application code or system configuration, occur, the organization is required to conduct a subsequent VAPT/Security Testing specifically for the modified portion of the application.
